DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 9-12, 14, 15, 17-20, 25-28, 30, 31, and 33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the array substrate for use in a liquid crystal display as recited in claim 1, in particular the limitation that the buffer layer between the substrate and the first barrier metal layer is a double layer, as amended on 21 May 2009, taken together with the other limitations of the claim. Such buffer layers tend to be either absent or un-mentioned (as in *Kim '511*, *Jo '847*, and *Onisawa '877*), or single-layered (as in *Terakado '502*, where the buffer layer is a single layer of nitride, albeit one formed by a series of three process steps: heating, oxygen plasma, and nitrogen plasma). Prior art such as US 2002/0070382 to *Yamazaki et al.* discloses a double layer buffer layer [101a, 101b] on a substrate, but in the different context of forming a polysilicon (crystalline silicon) layer directly on the buffer layer, rather than forming a gate wiring on the buffer layer as in the presently claimed invention. Claim 1 is therefore allowed, as are its dependent claims 2-4, 9-12, 14, and 15.

Similarly, the prior art does not disclose the method of forming an array substrate for use in a liquid crystal display device as recited in claim 17, in particular the limitation that the buffer layer between the substrate and the first barrier metal layer is a double layer, as amended on 21 May 2009, taken together with the other limitations in the

claims. Claim 17 is therefore allowed, as are its dependent claims 18-20, 25-28, 30, 31, and 33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
